

PROBLEM STATEMENT:

Further experience with

- a. how an HTML document is displayed using Cascading Style Sheets (CSS).
- b. cascading rulesets, and class containers, ID's, etc..
- c. forms

Extend and modify a previously created webpage (Lab03).

CODE :

In the BrghtIdeas' navigation bar, there is a deadlink for Frequently Asked Questions page. Create a page that follows exactly the same style for the header and footer, but has a list of questions and answers as its main content. Use lorem ipsum text as a placeholder(if you want to create questions and answers that's ok).

Save the page as faq.html. Link the page by completing the href attribute in its associated <a> tag.

Include this page in the same directory. Link the faq.html back to the main splash page, index.html.

Be sure to link the faq.html to the style.css file. Add any additional style rules to style the content of the faq.html file.

In the BrghtIdeas' navigation bar, there is a deadlink for a Sign Up! page. Create a page that follows exactly the same style for the header and footer, but has a sign up form as its main content. See below window capture for the form.

Consult the provided signUp.txt for how to begin creating the signUp.html page
You must use this layout (i.e. it must be in a within the content element, etc)

The Sign Up phrase is to be a header

Create a form and identify the forms process using the POST method with it actions attributes set to <mailto:email.isp.com>.

Add seven text boxes for first name, last name, address, city, state zip and email address.

Add two radio buttons for users to identify if they ever paid for ideas.

Add a selection menu with three options for choosing their ideas (My own brain, Other people
The internet)

Create a second set of radio buttons to say whether they ever purchased ideas.

Create a textarea for additional comments and set it to 6 rows and the appropriate number of
columns to fit in the container without running into the other container.

Add Submit and Reset buttons at the bottom of the web page form.

Save the page as signUp.html. Link the page by completing the href attribute in its associated <a> tag.
Include this page in the same directory. Link the signUp.html back to the main splash page, index.html.

Be sure to link the signUp.html to the style.css file. Add any additional style rules to style the content of
the signUp.html file.

Deliverables:

Submit, in lab, on 1 October 2019, hardcopies of your ReadMe.pdf , your html source
and your css style.code. Must be stapled.

Also, send to streller@ecc.edu an email this the exact subject

cs215_Lab_04

In this email attached the above named zip file

LastName_ Lab_04_cs215.zip

The zip file must include your ReadMe. This file that contains your name
at the top, the lab number, any comments regarding the assignment,
and window captures to show the program execution. The ReadMe file
must be in the top level project folder.

Grading will be based on **correctness of the html, css files** and how the page is rendered in a browser.
